Brad Dozier

Web Developer

I am a career changer that is looking to parlay my recently acquired technical skills with skills that I have developed as a dedicated and proven restaurant owner and manager into a successful second career in web development.

WORK EXPERIENCE

Owner/Manager
Craft Hall, LLC (Ralston's Drafthouse)

07/2012 – 04/2020

Achievements/Tasks

- Direct and lead staff in order to maintain and increase employee productivity; quickly resolve any problems in order to prevent them from escalating
- Coordinate weekly with management team to develop strategic plans to increase sales, profit margins, productivity, and customer satisfaction
- Develop and implement company policies and ensure all employees adhere to policies, procedures, and regulations; provide direction and discipline when necessary
- Communicate daily with a support staff of lead servers, lead bartenders, and lead kitchen staff to ensure management's directives are being implemented, as well as to obtain constant feedback on ways to improve any and all aspects of Ralston's operations
- Monitor and analyze inventories, sales forecasts, and current trends in order to maintain proper inventory levels
- Reduce and control expenses through managing vendor pricing and continuously conducting product price analysis
- Collaborate with distributors to ensure to the growth of craft beer sales through employee beer educations, promotional events such as craft beer and food pairings, and craft beer tastings
- Stay current on the latest trends and newest product offerings in the Indianapolis craft beer market, create new draft lists weekly, and train bar and wait staff daily on any new products
- Recruit, train, schedule, and monitor up to 40 employees, including performing job reviews and appraisals
- Adhere to regulations of health department and ensure compliance with alcoholic beverage regulations

TECHNICAL SKILLS

HTML   CSS   JavaScript   PostGres

Express   React   Node.js   Bootstrap

Github   Heroku   Postman

PG Admin   Sequelize

PERSONAL PROJECTS

SongsterrAPI (05/2020)
- Created a song search app that taps into the Songsterr API to produce a list of songs by artist. The project utilized Node.js, HTML, and CSS.
- https://apichallenge-bd93.web.app/

Vegetarian Meal Ideas App (06/2020)
- Built a full CRUD React App to store and display your favorite vegetarian meal ideas. Built server side with Node.js and the client side with React. Styled with Reactstrap and CSS, and deployed with Heroku.
